SKILLS

Languages: JavaScript, HTML, CSS, Python, SQL
Stack: Node.js, React, MongoDB, graphQL
Portfolio: ydennekrf.github.io/Juicy-Port

Back-end focused web developer, recently earned a certificate in full stack web development from University of Toronto's school of continuing studies. Every project I am involved with my aim is always to develop code with the future in mind, allowing for ease of future development. I am eager to test my skills and expand my abilities within a quality first team.

PROJECTS

Stocker Inventory

Github url: https://github.com/SuedePritch/furry-leftover-broccoli
Deployed app: https://stockerinventory.herokuapp.com/
Summary:
Created a e-commerce front end to support an inventory management application using a full MERN stack
Role:
Backend database design and inventory logic.
Zelda Travel App

Github url: https://github.com/Ydennekrf/Zelda-Travel-App
Deployed App: https://ydennekrf.github.io/Zelda-Travel-App/
Summary:
This lightweight app uses 3rd party api's such as ticketmaster to search for a city to render a map with points of interest and upcoming events.
Role:
All javascript and implementing the api calls.

WORK EXPERIENCE

Project Manager   2020 - 2021
Canal side soda   Grimsby, ON
- Created Inventory management system using excel
- Managed team of 5 people
- Built the product selection up from 3 brands to 10 brands
